3YR AVERAGE COMPARISONS

Overall decrease in homicide rolling 3-year averages since 2017. Year-over-year decreases beginning at 10% from 2017-2018, 11% from 2018-2019, and a slight 0.8% increase from 2019 to 2020. Total decrease of 20% since 2017.

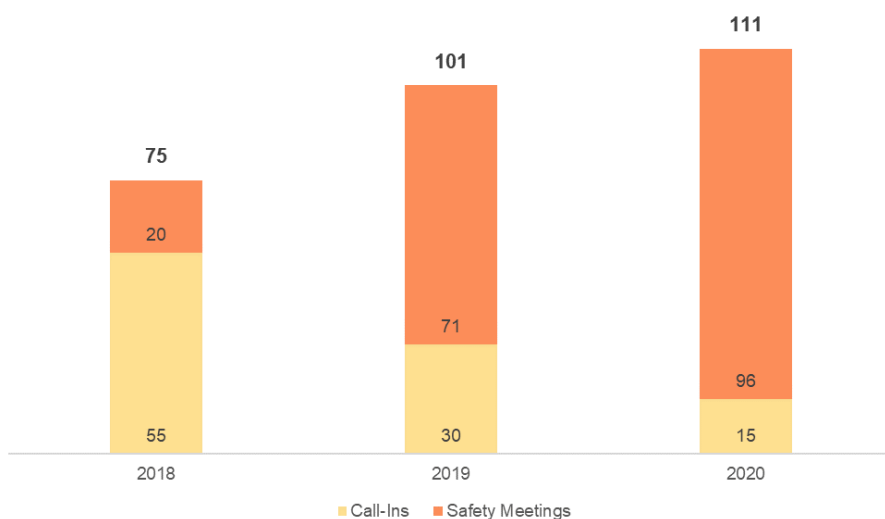

As budget and staffing levels have increased so has the capacity to expand operation ceasefire and OVP's capacity to take on high-risk caseload.

The chart below does not consider staff that were inactive at any time, e.g. out on worker's comp.

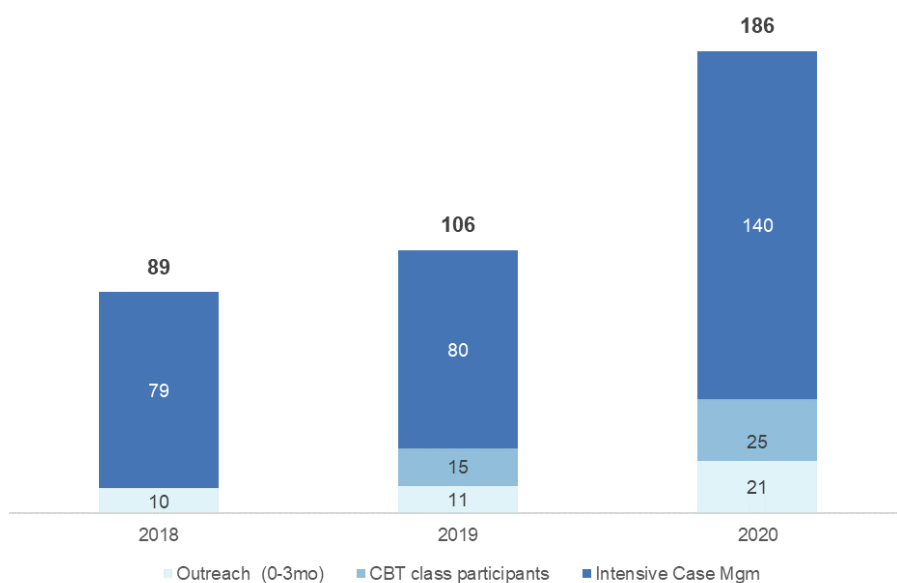

Budget has increased 20% and staffing has increased 27% since 2018.

### Operation Ceasefire

### High Risk Caseload

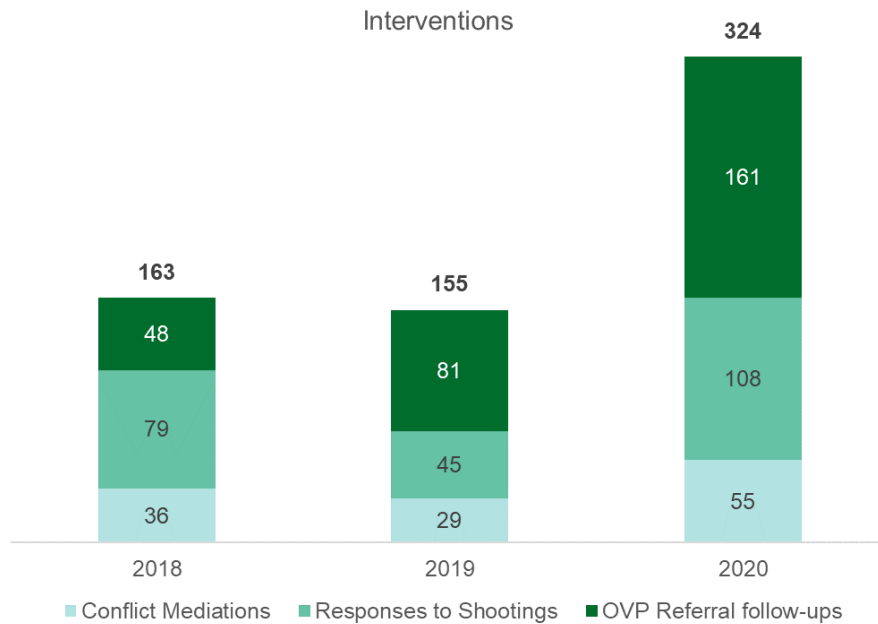

Question: How will call-ins be handled this year?

- Even without COVID-19 it is estimated that call-ins would still have trended downward because they are less personal than the safety meetings.
- Goal to have 100 communications a year. Goal has been met in 2019 and 2020.

It was noted that the probation office has been largely unavailable since March.

Question: How does COVID-19 impact client outcomes?

- It was noted that warehousing jobs have become more available and have allowed clients to gain employment.
- Of the blue graph above under intensive case management, 110 have been worked with over the last 3 months.

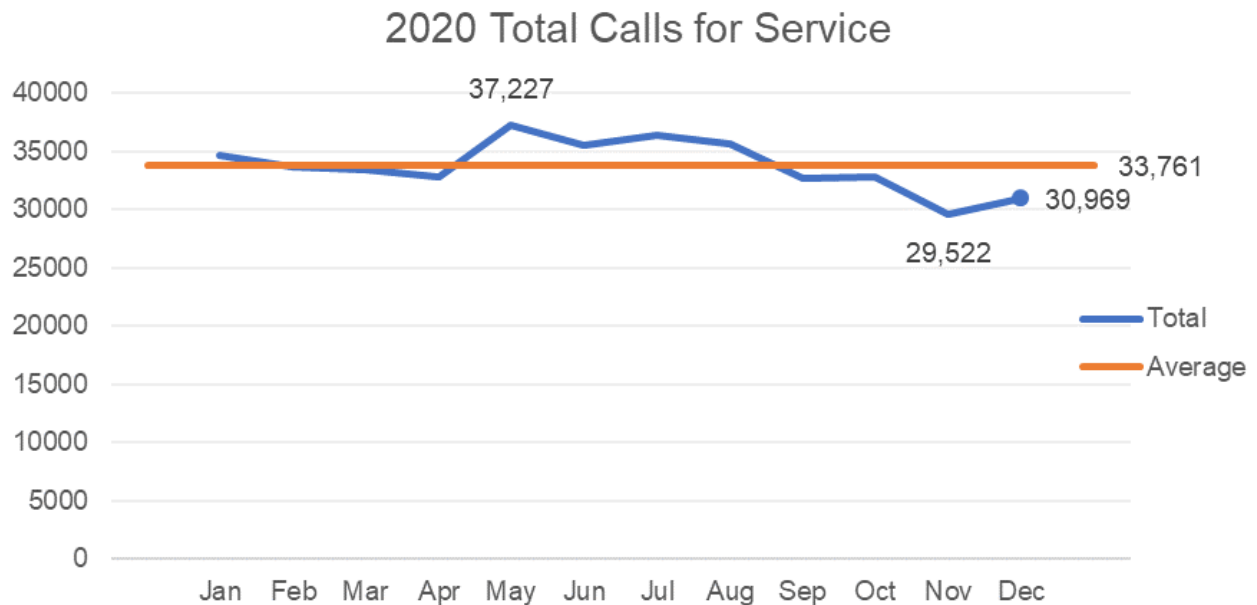

- Noted that 1 shooting can spur 4 related shootings
- Conflict mediations specifically counted as an involvement that deters at least 1 shooting

## Calls for Service

### Overview – December 2020

In December 2020, there were 30,969 total calls, which is a 5% increase from November 2020 and a 9% decrease from December 2019.

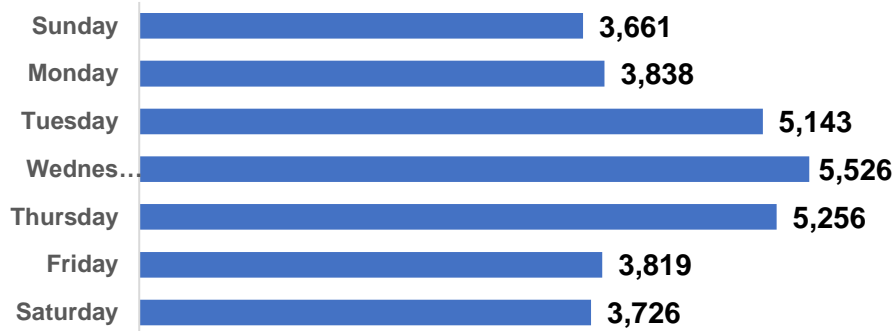

Call volume spikes during the middle of the week and mid-day. The mid-day spike matches the overlapping shifts.

Tuesday, Wednesday, Thursday volume mirrors the overlapping of shifts and the current inclusion of self-generated calls. Self-generated calls is a definition that has been in progress since the onset of CMRB. Finalization of this definition from the department will allow for refined analysis.
