

California Recycles

California's Green Building Code requires all counties and cities in the state to divert 65% of its construction and demolition waste materials from landfills. Construction and demolition debris accounts for about 20-30% of our waste stream. Recycling construction and demolition materials is therefore essential for the city to meet its state mandate.

Common construction and demolition materials include lumber, concrete, asphalt, drywall, metals, bricks, carpet, rocks, dirt, cardboard, and various roofing materials. Many of these materials can be reused or recycled, reducing the waste going to landfills.

Construction & Demolition Debris Recycling Program

What is the Construction & Demolition Recycling Program?

The City of Stockton requires that all construction, demolition, or renovation project permit applicants reuse, recycle, or divert 65% or more of the debris that is generated with their project.

How Do I comply?

Step 1: Have a Waste Plan

- Identify the waste that your project will generate
- Prepare a disposal plan

Step 2: Divert 65%

- Take materials that are recyclable to a Recycling Facility (see Resource List), or hire a permitted hauler

Step 3: Submit a Recycling Report

- Return your recycling report within 14 days of job completion.
- Include weight tickets and receipts

Who Can Haul My Waste?

Permit applicants can self haul the waste they generate. Or they can hire someone to haul their waste. Hired waste haulers must be permitted to collect and transport construction & demolition debris from job sites in the City of Stockton.

PERMITTED HAULERS

California Waste 209.369.3712

Republic Services 209.466.5192

Waste Management 209.946.5721

Where Can you Recycle?

Many recycling facilities in our area recycle construction & demolition materials. The C&D Resource List that is included in your Permit Application Package has information about local facilities. . You can also find the Resource list at :

Tips

- 1 Separate trash materials from recyclable materials. For example, keep all lumber and clean wood separate from broken glass, plastics, and wood that has been treated with paint .
- 2 AC units and water heaters that are taken back to shop and picked up later by a recycler must be accounted for. Ask your recycler to provide you with a monthly receipt showing the number of units that were picked up.
- 3 Composition roofing shingles should be taken to SPT - Shingle Dump at 10500 South Harlan Rd., French Camp CA 95231. Call them to ask about discounts and first load for free. 1-916-533-8013
- 4 Consider deconstruction instead of demolition and find out about tax savings by donating reusable items (light fixtures, sinks, faucets, doors, etc.) to Habitat for Humanity (209-465-5054) or the ReUse People (209-241-3614).
