CERTIFICATION

1. This building or structure has been inspected and to the best of my knowledge complies with the provisions of the Building Codes of the City of Stockton existing at the time of this permit. PERMIT NO. 56967 FINISHED 12/10/68

2. The use of the land described above meets the definition and requirements of the Zoning Ordinance of the City of Stockton.

3. This building has been inspected under the pertinent Ordinances of the City of Stockton and may be occupied as a __________________ subject to the following:

CHECKED BY 

SUPERINTENDENT OF BUILDING SAFETY

SUBMITTED BY 

ENFORCEMENT OFFICIAL

NOTE: The City of Stockton shall be notified by the owner or operator of any hotel or apartment house, of any change in the ownership, or possession thereof. Said notice shall be in written form and shall be furnished within 30 days from and after any such change of ownership or possession.

This permit shall be plainly exposed in the above premises.

Section 13-041: Any person in violation shall be guilty of a misdemeanor, and shall be punishable by a fine or not more than $500 or by imprisonment of 6 months, or by both.

THIS PERMIT IS REVOKABLE AND NON-TRANSFERABLE
DEPARTMENT OF PLANNING
CITY HALL

February 13, 1967

Mr. John W. Nordstrom
Vice President
Swift & Company
115 West Jackson Boulevard
Chicago, Illinois 60604

Dear Mr. Nordstrom:

Pursuant to Section 16-064.2 of the Stockton Municipal Code, I have reviewed your development plan and letter of January 10, 1967 in which you outlined in detail the process you intend to follow in the operation of a proposed meat packing plant on Santa Fe property located on Harcourt Road.

In regard to your proposal, this department finds that it meets the basic requirements and appears to satisfy our concern regarding the methods to be used to prevent any nuisances originating from your proposed operations. Therefore, under the authority granted to me by the Stockton Municipal Code, I approve of your location and development.

I wish to point out that approval of this development plan is in compliance with the provisions of the Stockton Municipal Code and does not relate to or administer by the Public Works Department or the Planning Department. I have taken the liberty of alerting all pertinent departments and the City Manager of my action and suggested that they make contact with you or the Santa Fe Railroad Company regarding any other ordinances which may relate to this development. I assume that your staff members who will be involved with the engineering and development of this project will be in contact with our Public Works Department and other developments within public rights of way. To this end, I trust that we may be of further assistance.

Very truly yours,

Herbert L. Epstein
Director of Planning

SUBJECT: REMODELING OF FORMER SWIFT PLANT NOW OWNED
BY JAMES ALLAN & SONS

You were in to see me about a week ago concerning the fact
that James Allan & Sons Company has purchased the former
Swift Meat Packing Plant and will be remodeling the plant
during the next year, and will ultimately go into a new
operation of slaughtering beef, hogs and sheep.

When you were in my office you raised two questions. The
first concerned sewer charges and what would happen during
the one year remodeling period as it relates to the demand
of sewer charges and other fees.

I know you have already met with Thomas Dosh, and as I told
you, that you should work directly with him on this matter
as he is the Director of Public Works. We can make adjustments
relating to industry waste charges. We want to work with
you in every way possible so that you not be charged excessive
fees during your remodeling period. We do have demands on
the system as a result of industry, and of course we have
required payments as a result of those demands. Mr. Dosh,
however, will thoroughly review it with you. We will make
every effort to reduce charges to the very minimum during
your remodeling period.
Your second question related to building permits. A building permit would be required as I understand it. We will not, however, have any requirements concerning use permits or any other charges from the Planning Department. Permits will be required for remodeling, mechanical, plumbing, electrical, fire and any building work involved. Our regulations, however, will be minimal. As you well know the State and Federal Departments of Agriculture as well as other agencies will be involved far more than the City. You can be assured that the Department of Building Safety will impose as little restrictions as possible involving your remodeling.

We are exceedingly happy to see your company come to this City. I have long felt that it was unfortunate that such a fine facility as the Swift Plant was not being utilized to the fullest. As I understand it, that with your operation it will be utilized to the fullest, and that further and most importantly, employment will be substantially increased at the plant once you get the operation into effect.

I have instructed my departments to work with you in every way possible to hold any requirements that we might have to the minimum, consistent with our ordinances. We do not intend to impose any restrictions or regulations on you.

We are happy to see you come to this City, and you can be assured that we will cooperate to the fullest in making your change over as easy as possible. I would hope that someday when some of the officials of the plant are in this area, I might have the opportunity to meet with them.

ELDER GUNTER
CITY MANAGER

Subject: Mariposa Lakes, Dairy Odors Issue

All,

During the final process of submitting the August version of the EIR, we tried unsuccessfully to get real data on the large dairy operations located immediately east of Kaiser Road, just north or Mariposa Road. The EIR was ambiguous about this issue, and RTMM commented on it. Over the next few weeks, we tracked down additional information, which I thought EDAW would find useful. I am providing it below in the form of a description, which you can hopefully cut into the EIR. Feel free to modify it as you see fit.

A dairying operation involving between 1,500 and 2,000 cows is located in the immediate vicinity of the SPA, approximately 1,200 feet east of Kaiser Road and approximately 700 feet north of Mariposa Road. Operated by Machado Dairy Farms, this operation was considered a potential odor source. A search of the San Joaquin Valley APCD's complaint data base was requested by InSite Environmental. The data base search returned no results; the APCD indicated that it has no records on file for that operation. The San Joaquin County Environmental Health Department, which has regulatory authority over dairying operations, was also contacted regarding odor potential associated with the Machado Dairy. The Department's Program Coordinator with responsibility for dairy operations indicated that the Machado Dairy involves occasional irrigation of crops with dairy wastewater, which may involve minor and short-lived odors. The Program Coordinator, who is also a resident of the area, is not aware of any substantial odor concerns associated with this facility.

Dan, Mike and Ray, this is just FYI. No action required.

Charlie
